Artificial Intelligence (AI)

From automagical stuff to machine learning algorithms

From GUI to scripts (DAX, M, R & Python)

Smart Features

Report

- Q & A
- Smart Narrative
- Insights
- Analytic Line
- Key Influencer Visual
- Decomposition Tree Visual
- Smart Custom Visuals
- What-if Parameter

Scripts

- DAX
- R Integration
- Python Integration

Power Query

- AI Insights
- Cognitive Services
- Azure Machine Learning
- Column by Example
- Web by Example

Demo

Questions & Answers (Q & A)

Ask a question using natural language

Refine via a related question

Provides answers from the data inside Power BI

Columns, Measures, Content, Filter, Visualisation

Synonyms

<https://docs.microsoft.com/en-us/power-bi/consumer/end-user-q-and-a-tips>

Insights

Majority, Top/Bottom, Correlation, Low Variance,
Steady share with parent

Overall Trends, Seasonality, Change points, Time
series outliers

<https://docs.microsoft.com/en-us/power-bi/consumer/end-user-insight-types>

Smart Narrative

Summarizes the content of a visual in plain English text

Text can be customized

<https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-smart-narrative>

Analytic Line

Analytics Pane for out-of-the-box lines

Constant, min, max, average, median, percentile

Trendline, Forecasting, Anomalies

<https://docs.microsoft.com/en-us/power-bi/desktop-analytics-pane>

Key Influencer Visual

You bring one dimension and multiple metrics,
Power BI will detect metric values are typical for
the each dimension value

<https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-influencers>

Decomposition Tree Visual

You bring one metric and multiple dimensions, Power BI will detect which metric has high or low values on each dimension

<https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-decomposition-tree>

(Smart) Custom Visuals

Microsoft and third-parties have published custom visuals on AppSource (aka Market Place)

<https://docs.microsoft.com/en-us/power-bi/developer/visuals/power-bi-custom-visuals>

<https://powerbi.microsoft.com/en-us/developers/custom-visualization/>

What-if-parameter

Advanced analytics by running scenarios on your data

Parameter changeable via a slicer

<https://docs.microsoft.com/en-us/power-bi/desktop-what-if>

R Integration

Source

<https://docs.microsoft.com/en-us/power-bi/desktop-r-scripts>

Transformation

<https://docs.microsoft.com/en-us/power-bi/desktop-r-scripts>

Visual

<https://docs.microsoft.com/en-us/power-bi/desktop-r-visuals>

<https://docs.microsoft.com/en-us/power-bi/service-r-packages-support>

Python Integration

Source

<https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-python-scripts>

Transformation

<https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-python-scripts>

Visual

<https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-python-visuals>

<https://powerbi.microsoft.com/en-us/blog/python-visualizations-in-power-bi-service/>

AI Insights

Enrich your data by using a pre-trained machine learning model

Fully baked into the product

You need premium workspace (capacity or per-user)

<https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/tutorials/tutorial-power-bi-key-phrases>

<https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/how-tos/text-analytics-how-to-install-containers>

Cognitive Services

Enrich your data by using a pre-trained machine learning model

You need:

- Enable Cognitive Services in your Azure Subscription
- Create your own Power Query function

<https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/tutorials/tutorial-power-bi-key-phrases>

<https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/how-tos/text-analytics-how-to-install-containers>

KEY 1

KEY 2

1 Grab your keys

Every call to Cognitive Services requires a 'Key' from the left menu.

Keys

2 Make an API call to this endpoint: https://northeurope.api.cognitive.microsoft.com/

Get in-depth information about each properties and methods of the API. Test your keys with the built-in testing console without writing a single line of code. Once you have the API running, you can check your consumption and the API health on Azure portal in your API 'Overview'.
